

# Latest Images Mockup

- This slide shows the current mockup on the SSC website
- Our current plans call for three columns of images
  - Behind on left
  - Ahead on right
  - SOHO *et al.* in middle
- In-situ data would be in separate browser, as stacked plots, with different colors used for Ahead, Behind, and ACE *et al.*

# SolarSoft Example: Latest Events

- Would have two separate event pages, one for each spacecraft
- The current SolarSoft page would give the middle view
